

Academics

The fabric of academic processes of the school is woven carefully beginning from the admission of a child in L.K.G. and leading upto 12th Std., to sow the seed of understanding, morality, aestheticism, spirituality and so on, so as to make him/her a good citizen completing the journey of life successfully and that is the aim of an educational institution. So is KDKVM, Renukoot, Uttar Pradesh.

The school is C.B.S.E. affiliated co-educational institution. The approach is to make effort for the holistic development of a child and in this process, the manual labour, staff initiative at different level, infrastructural supply, empowerment of the self become a source of help knowingly or unknowingly, separately. Nothing more or nothing less, the child is the prime concern of all. Such is the vision and it works like the mission of the school. Thus quality education is being imparted and excellence is being harnessed. The quality parameters are maintained too.

And thus, students are set to learn and perform on their own in such an atmosphere where body, mind, heart and soul are happy and work together, developing the personality around. Thus learning is a joyful experience and the entire process of education is an exalted being here. Not only Hindi and English work as the language support but also from class 6 to class 8, Sanskrit is a language option too, to the students. Thus academics lies in the core of curricular activities at the school.
