

Action Plan

education providers.

The power of mind and heart both need a support in the names of training, teaching and learning. The behavior of intellect must go with the refinement of heart and the discipline of spirit. This is what one calls the best output of education ending into realization, understanding and knowledge of the self- an educational institution thrives for the same. Thus education is the name of natural, progressive and systematic change being evident in the name of a child/student who happens to be a dedicated human, a farsighted leader, an improved character and useful dynamic global citizen and a pure soul inspiring all who come across in life and after.

the names of academics, sports, art, music and speaking skill etc. The technological advancement paves the way to knowledge.

Kesari Devi Kanoria Vidya Mandir, Renukoot (Under the aegis of Aditya Birla Group Schools) being an institution for creating a better future for all children. With all the initiatives taken to get an academic output, it is always a prime concern to take stock of the holistic upbringing of a child under the guidance of educators, teachers and performers nurturing all the intrinsic values known and felt in all school hours for the well being of the self and to nurture thoughtful and proactive world citizens and leaders committed to the service of humanity. Here Education is not about only nurturing, supporting, teaching and guiding student; it encompasses a deep moral concern too as

On all the basis, the school's positive congenial climate supports the functioning of the institution in different categories viz. the real classroom teaching, training programmes, career counseling, community work, safety awareness, character building, student initiation and functioning, leadership development, innovation and information etc. -These are not set in watertight compartments, rather in self acknowledged world where the dwelling of a groomed soul is permitted as the esteemed student of the institution. At school the curricular and extra-curricular activities are promptly being regulated to enhance the understanding of a child in
