

## Chairman's SMC Message

**"Education is not merely the learning of facts; it is the training of the mind to think."**

**-Albert Einstein**

Our school, Bhavan's KDKVM, Renukoot, is committed to guiding society and nurturing young minds.

Our mission is to instill discipline, modesty, and creativity in our students, shaping them into skilled and responsible citizens. We strive to create a conducive learning environment that fosters holistic development and excellence.

We are providing safe and secure environment, equipped with 38 CCTV cameras, grilled windows, fenced premises, and comfortable study spaces with modern furniture. Our faculty is passionate about imparting knowledge and values, empowering our students to achieve greatness.

The school provides holistic education and an environment that considers the growth of students in all essential areas: the aesthetic, creative, ethical, linguistic, manual, mathematical, scientific, and social. As we believe, "True stars rise to the top not by chance, but through purpose and passion."

It gives me immense pleasure to appreciate and acknowledge the unique work of our students in bringing new laurels to the institution. I would like to take this opportunity to commend all the winners in various fields of the ABG Competitions, as they have brought pride to our institution.

### **Current Obstacles and Their Resolution**

Despite our exhaustive efforts throughout the year, some students required additional support. Therefore, before the commencement of the Board Examination, and during appropriate gaps in the examination schedule, students were invited to school for additional instruction from their respective teachers. We hope this will positively impact their performances.

### **Teacher-Student Guardianship**

Last year, we introduced a new initiative called Teacher-Student Guardianship, which continues this year. In this initiative, two students are assigned to each teacher. The concerned teachers engage with students and their parents to understand their basic problems and queries, providing necessary support. We hope this endeavor will lead to improved results.

### **A Unique Initiative**

This year, we have implemented a new initiative called Value Cell Activity, where students will assess themselves. The evaluation criteria include:

- 1.Participation in school activities
- 2.Completion of assigned tasks
- 3.Discipline
- 4.Notebook maintenance

Students will grade themselves honestly based on these points, helping them recognize areas for improvement. Nothing is more important than self-realization. I extend my sincere thanks and appreciation to the Principal, teaching and non-teaching staff, students, and their parents for their continuous efforts in achieving the desired goals of the school.

**Mr. Manish Gurg**  
**(Chairman, SMC)**
